ADDITIONAL INFORMATION SUPPORTING NJD (e.g., paragraph 1 - site conditions; paragraphs 2-3 - rationale used to determine NJD, including information reviewed to assess potential navigation or interstate commerce connections; and paragraph 4 - site information on waters of the U.S. occurring onsite):

Site Conditions: Four small seasonal wetlands adjacent to an irrigation canal.

Rationale for NJD: Old aerial photos and topographic maps indicated canal was constructed in uplands for crop irrigation purposes. However, the seasonal wetlands are not used for interstate commerce.

Waters of the U.S on site: Alamo Creek flows through site from west to east.
